

Specialized Equipment for the Offshore Oil & Gas Industry

EMERGENCY BREATHING SYSTEMS (EBS)

Survival Egress Air (SEA) and Passenger Short Term Air Supply Systems (PSTASS)

- Provide critical air supply in the event of helicopter mishaps over water
- Field-proven by the US and allied militaries
- Manufactured by Aqua Lung, the world leader in underwater breathing systems
- Classified as CATEGORY A devices as defined by UK Civil Aviation Authority
- Distributed exclusively by Capewell Aerial Systems

EBS GROUND SUPPORT & REFILL EQUIPMENT

Mobile Refill and Charging Stations

- LSAC refills the full range of Aqua Lung EBS systems up to 5500 psi
- MRS and DRS refill EBS systems from 3000-4500 psi
- Designed to be mobile and deployable
- Field-proven by the US and allied militaries
- Complete package of tools, spare parts, and training readily available

Life Support Air Compressor (LSAC)

Mobile Refill Station (MRS-4500)

Deployable Refill Station (DRS-4500)

SeaTEP PERSONNEL & EQUIPMENT TRANSFER SYSTEM

Safe Transfer Personnel and Supplies to/from the Drilling Platform

- Unique platform carries up to ten individuals or 3500lbs of supplies
- Reduces the risk of accidental falls
- Includes integrated safety restraints with flotation devices
- Folds for easy stowage. Weighs approximately 150 lbs.
- Easy to use and maintain
- Training included
