

Weighted Static Discharge Cable

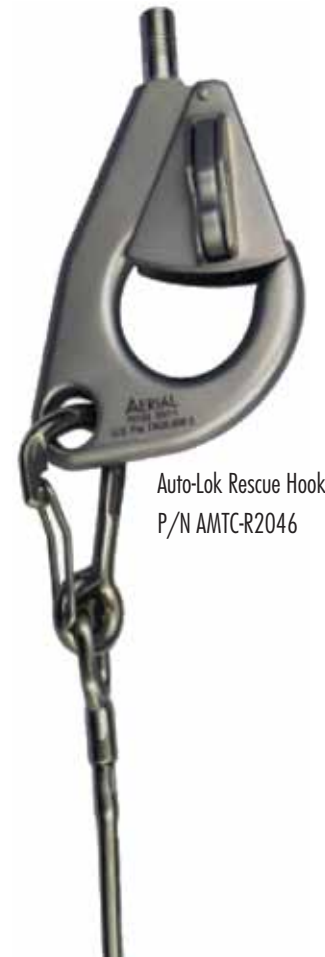

Static Discharge Cables are designed for use with helicopter rescue hooks to discharge static electricity before the hook comes in contact with people or objects. This premium cable is a step up from standard discharge cables in that it includes a torpedo weight that helps to stabilize the cable and reduce movement in the rotor wash.

FEATURES & BENEFITS

- Prevents electrostatic shock
- Stainless steel stabilizer weight limits swinging/circling caused by rotor wash
- Compatible with all rescue hoist hooks
- Cable is 10 feet long
- 5/16" diameter steel cable with orange plastic coating and reflective stripe
- Attaches with stainless steel gated snap hook
- Break-away safety feature at 250 - 300 lbs.
- Total assembly weight: 2.2 lbs.
- Available exclusively from Capewell Aerial Systems
