

# Dry Suit Test Kit

Capewell's Dry Suit Test Kit allows technicians to perform periodic dry suit performance evaluations as recommended by suit manufacturers and often required by military and SAR organizations.

- Works with Mustang and Switlik dry suit brands as well as others
- Kit includes neck plugs with closure devices, wrist and ankle clamps, high-pressure pneumatic hoses and control box with specialized flow controls.
- Follow simple instructions to seal and inflate the suit for leak identification.
- Works in conjunction with standard air compressors
- P/N AMTC-K2008-A
