

## Light and compact

- 85 kg (188 lbs)
- 1 531 x 350 x 350 mm (60 x 13.8 x 13.8 in) when folded

## Efficient

- 10 passengers / 1500 kg
- Deployment and transfer in 10 mn

## Versatile

- Cargo and passengers transfer
- Routine transfer
- Emergency evacuation

## Safe & Simple

- 10 safety belts with individual floatation kit
- Suitable for stretcher transfer
- Hands free and 360° vision

## SeaTEP – Oil and Gas

Airborne rescue knowledge dedicated to offshore transfer.

SeaTEP is the most innovative personnel transfer device.

## ANY TRANSFER ON A RIG

SeaTEP primary application is to perform daily transfer operations for drilling rigs.

It includes personnel, material and cargo transfers. SeaTEP capabilities widen its range of applications either at sea (emergency evacuation) or on ground (pipeline maintenance and surveillance, wells maintenance operations).

Among other activities, SeaTEP is designed for routine personnel transfer, planned emergency evacuation, medical transfer (stretchers) and cargo supply.

## READY TO USE

SeaTEP belongs to the semi-rigid category of systems for offshore personnel transfer.

SeaTEP is easy to fit due to compact and collapsible features: incredibly small volume and optimized dimensions.

The user-friendly design generates intuitive moves and offers an unequalled feeling of safety.

## SPECIFICATIONS

Passengers	10	people
Weight	85	kg
Safety Belts positive buoyancy	40	kg
Safe Working Load	1500	kg
Total Buoyancy	> 350	kg
Temperature range	-30 ... +50	°C
Seawater resistant		

## QUICK AND SAFE

### Fitting

The crane operator and the engineer in charge on deck keep control of the SeaTEP during all phases of transfer.

### Boarding

A tensioner keeps rope slack away from boarding personnel. Stepping aboard is intuitive. Passengers board and secure themselves quickly and focus on safety and protocol.

### Transfer

Passengers are secured by a lanyard, are hand free and maintain a 360° vision.

Each worker is equipped with an individual floatation kit.

## MAINTENANCE AND SERVICES

- Low maintenance and easy part replacement
- Full training range:
  - Technical training
  - Operational training
  - Maintenance training
- Customized services
- Leasing services
