# RESCUE & PERFORMANCE

## Specifications

SAFE WORKING LOAD  
1 500 kg / 10 Pax

SAFETY BELTS  
AirTEP 300 kg SWL  
SeaTEP 40 kg positive buoyancy

TOTAL WEIGHT  
AirTEP 53 kg  
SeaTEP 85 kg

TRANSPORTATION AND STORAGE  
Collapsible

USER FRIENDLINESS  
Minimum training required for passengers

QUALIFICATION  
Designed and approved for various helicopter platforms  
Compliant with international regulations

ENVIRONMENTAL RANGE  
-30°c to +50°c

SEA-WATER RESISTANT AND FIREPROOF

## AirTEP MILITARY

### APPLICATIONS

**The system is used in military extraction or rescue operations, typically when helicopters cannot land.**

Extracting people one by one is highly risky especially when times and conditions are at the worst. AirTEP protocol is quicker and safer.

- Special Ops
- Maritime Counter Terrorism (MCT)
- Counter Terrorism (CT)
- Combat Search and Rescue (CSAR)
- Hostage Rescue
- Cover Operations
- Anti Narco Missions

AirTEP

# CIVIL DEFENSE

## APPLICATIONS

**Critical rescue operations (Fire fighting, Naturel Disaster, Search and Rescue) can be managed with great benefit by all units using AirTEP – Airborne Tactical Extraction Platform.**

Compared to winch, AirTEP enables a significantly better Victims per Sortie ratio and therefore saves hours of flight for pilots and the aircraft.

- Fire Fighting
- Earthquake Management
- Search and Rescue
- Medevac
- Emergency Delivery
- Mountain Rescue
- Mass Casualty Situations

SeaTEP

# OIL & GAS

## APPLICATIONS

**SeaTEP primary application is to perform daily transfer operations for drilling rigs.**

It includes personnel, material and cargo transfers. SeaTEP capabilities widen its range of applications either at sea (emergency evacuation) or on ground (pipeline maintenance and surveillance, wells maintenance operations).

- Routine Personnel Transfer
- Planned Emergency Evacuation
- Medical Transfer (stretchers)
- Cargo Supply
